

# NEW FEATURE SPOTLIGHT

Twingler Pages are now shareable across various social-media services

# What's New?

An ability to share Twingler generated HTML pages with ease, across Twitter, LinkedIn, and WhatsApp, plus communication channels such as email, text messages, etc.

Remember, these pages include:

- Embedded Knowledge Graphs -- providing Semantic Web entry-points for deeper exploration
- RSS & Atom Feeds for Content Syndication -- which applies to Threads or Search Results

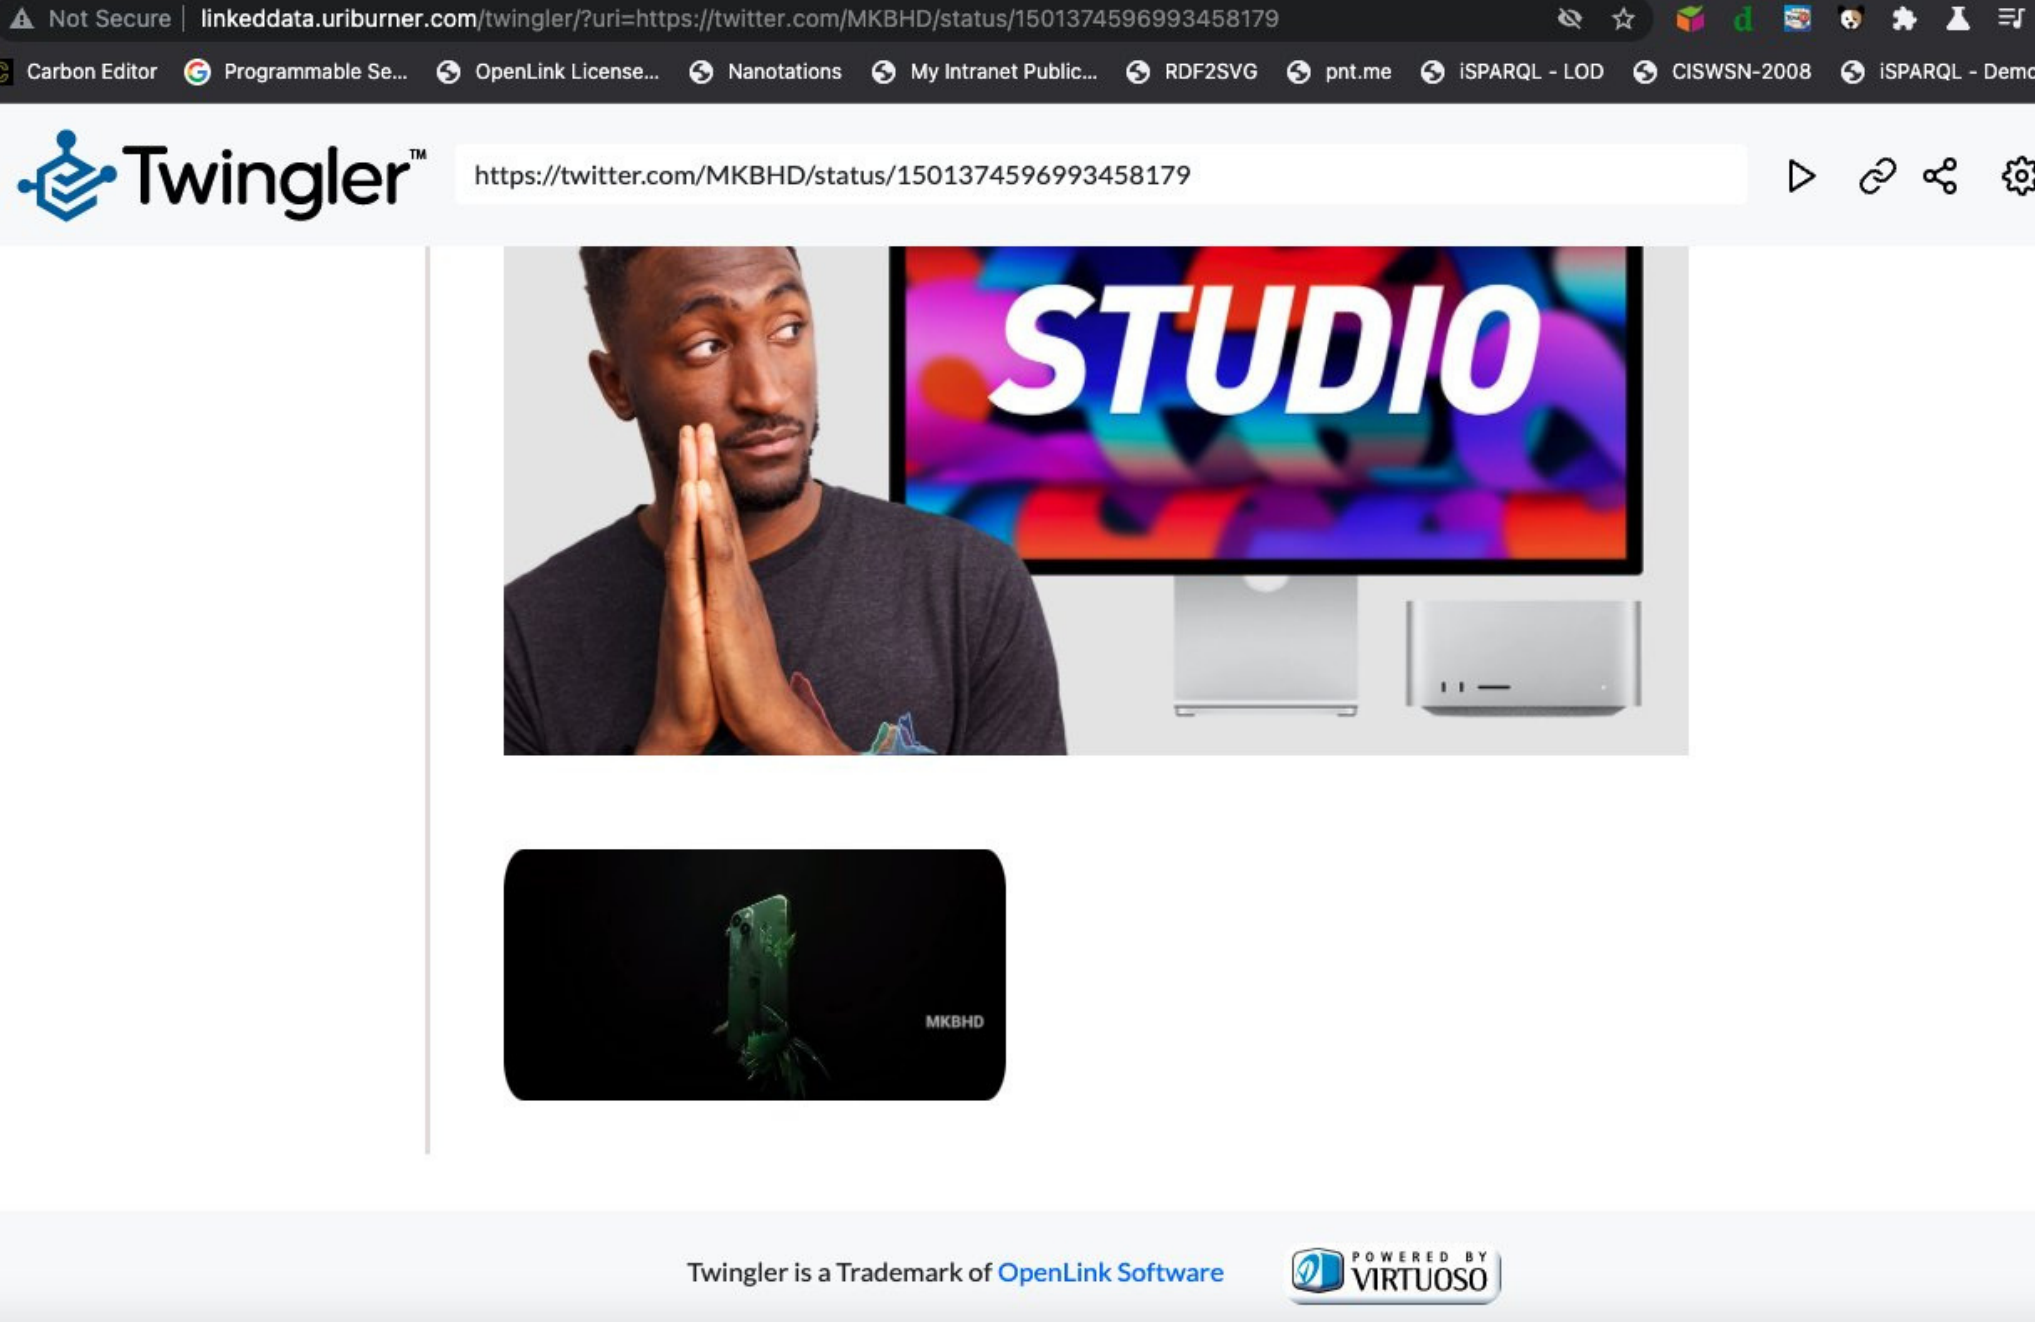

# Demonstration using the new sharing feature of Twingler

# Step 1:

Visit threaded content  
that you Twingled

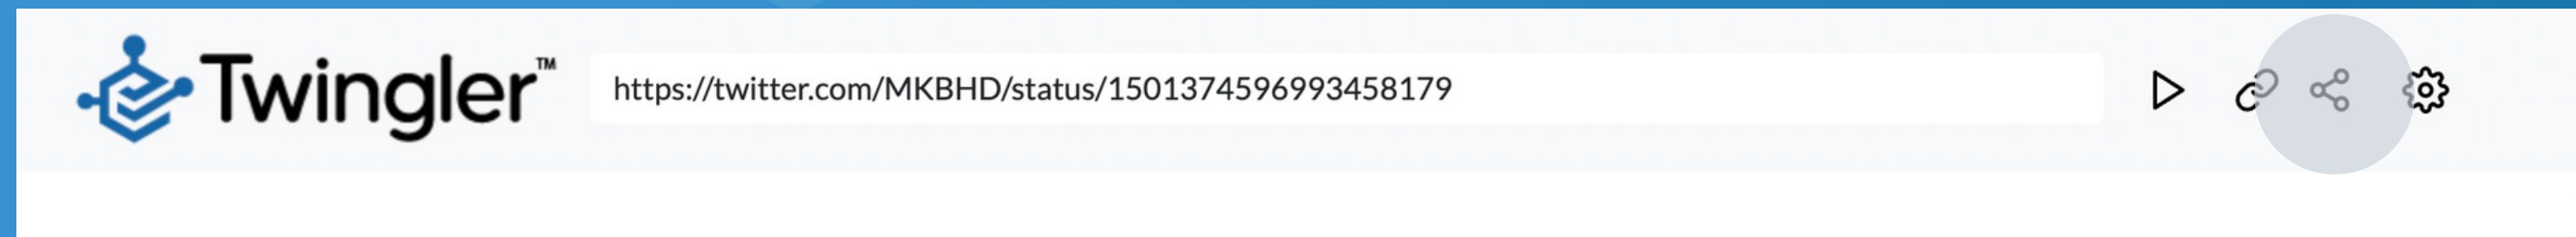

For instance, New MAC  
Studio Events

The screenshot shows a web browser window with the Twingler interface. The address bar displays the URL <https://twitter.com/MKBHD/status/1501374596993458179>. The Twingler logo is visible in the top left corner. The main content area displays a tweet from MKBHD featuring a video thumbnail of him with his hands clasped in prayer, looking at a monitor displaying the word "STUDIO". Below the video is a smaller thumbnail of a green fish. At the bottom of the page, there is a footer with the text "Twingler is a Trademark of OpenLink Software" and a logo for "POWERED BY VIRTUOSO".

## Step 2:

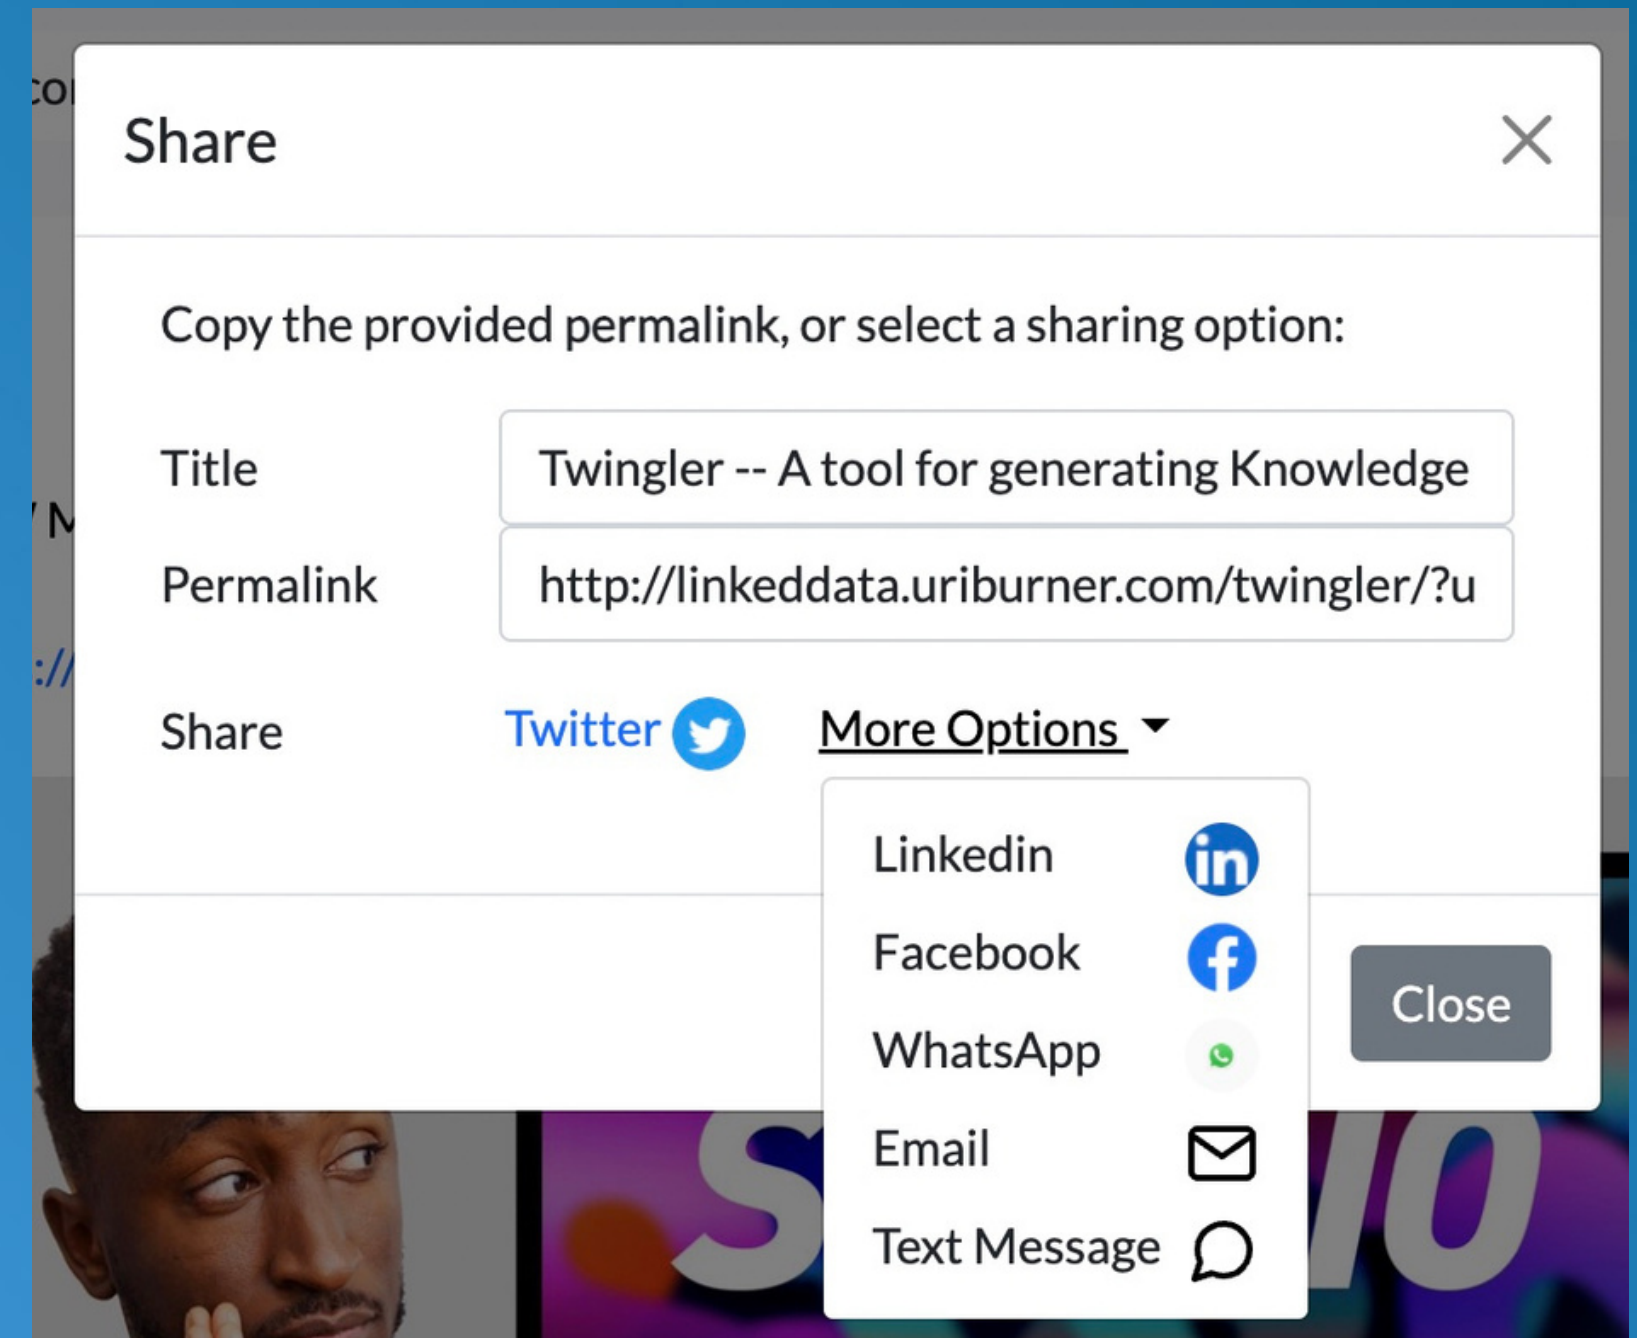

Click on the Share icon presented at the top of the Twingler page

## Step 3:

Selected the preferred method of sharing — LinkedIn, Facebook, WhatsApp, Email, Text Message

# How Do I Get Going?

It's simple!

1. Reply to a thread with "*@DataTwingler unroll*" to invoke the service.
2. You will receive a response with a link to the generated Knowledge Graph nugget
